## Statement of Purpose

Respected sir/madam,

### INTRODUCTION

I am .....daughter of Mr. ....and Mrs....., a permanent resi-dent of....., bearing a passport numbered..... My date of birth is .....I am glad to be accepted by Australasian Interna-tional Academy for Diploma and Advanced diploma in Information Technology and I have written this letter to show my future plans after pursuing a degree from Australia. My interest in computers and technology has led me to choose Infor-mation Technology for further study and to gain a successful career.

### ACADEMIC QUALIFICATIONS

As far as my academic qualifications are concerned, I completed my SLC ( School Leaving Certificate) from Akash Deep English Secondary School in the year 2015 A.D. securing 82.38% with distinction under the board of Government of Nepal. As I finished my school, I decided to take computer science as my major subject in high school or (+2). Thus, I joined Himalayan International Model Secondary School in Narayantar, a renowned college of business in Kathmandu and complet-ed my board exam with first division obtaining 68.30% in the year 2017 undertak-en by Nepal Examination Board (NEB). After the completion of my +2, I began searching for best institutions of IT (Information Technology) in Nepal but I was not satisfied as they were not reliable and only a few of them were providing quali-ty education. Thus, I decided to go abroad for study and found Australia to be the most suitable country for international students after USA and UK doing some re-search in internet. Following that, I took my IELTS (International English Lan-guage Testing System) examination and secured overall band score of 5.5.

## WHY NOT NEPAL ?

Firstly, talking about the education system of our country, it still runs in a traditional way and this phenomenon is directly affecting the students of today's generation. Secondly, political instability as one of the major problems of our country which sometimes causes problems for education system to run smoothly or effectively. Information technology on the other hand, is a new course for Nepalese students and only a few educational organizations are capable of providing standard education in this sector. However, they also lack some experience and most of the teaching method is theoretical rather than practical. So, in order to enjoy the international standard of studying and learning, I decided to go for abroad study. Getting an international level certificate is the only way that I could have a best and bright career ahead which will help in my personality development as well as to contribute in the development of my society and country.

## WHY AUSTRALIA ?

This question comes every now and then in my mind but after going through internet, I was clear that Australia is the global leader of education as it provides quality education and some of the top ranking universities of the world are present here in which 50 of them are in the list of world's top universities. They provide students with over 22,000 courses across 1,100 institutions. Australian universities are widely recognized for excellence in many disciplines due to international reputation and global recognition of the education system. Moreover, students which are the outcome of Australian universities are globally recognized. This will make a suitable environment for international students to work in every corner of the world. Likewise, Australia is the third country having highest number of international students after USA and United Kingdom. This provides me the opportunity to enjoy different cultures and traditions from all over the world which will ultimately enhance my personality. Similarly, Australia also has the best and the safest environment for students as it provides them with good quality of life. On the other hand, students are allowed to do some part-time jobs helping them to cover their living expenses. International students get very easily adapted in the

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

Australian environment which will help them to focus on their studies leading to a bright future full of opportunities. In the same way, the Australian government invests its huge amount of annual budget in education sector. The government also supervises the education system in order to maintain the high standard of education that the country provides.

In addition, the new concept of Future Unlimited Australia works effectively to provide realistic, productive and beneficial education. Majority of courses and training provided to international students are controlled by Australian Qualification Framework (AQF). Similarly, I have also heard about the Tuition Protection System (TPS) and helps international students to secure their investment as well as their future.

## WHY SYDNEY?

Sydney is the biggest city of Australia having highest number of international students. The environment of Sydney is considered one of the best for international students providing them with best facilities and the best quality of life. Sydney being one of the cities having people of different cultures will provide me the opportunity to enjoy diverse cultures and lifestyles. Likewise, the weather of Sydney is similar to my country Nepal i.e. temperate climate having warm summer and mild winters. There are many reasons for choosing Sydney and some of them are listed below:

- High quality education, research and technology
- Internationally recognized courses
- Best student life
- Lovely weather
- Modern facilities
- Cultural diversity
- Developed public transportation
- Safe and secure environment

In addition, I asked my friend who is already in Sydney as a student and I was happy to get a

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

very positive response from him. Also, Sydney is the home of many world-famous wonders such as Sydney Opera House, Bondi Beach, The Rocks, Sydney Harbor Bridge, Sydney Harbor, Paddy's Markets, Darling Harbor, the Blue Mountains and so much more. Many people from all over the world speaking different language and having unique cultures reside in Sydney. This will provide me the opportunity to have a taste of great cultural experiences that may help me to have a great time while I am studying. Indian, Greek, American, Brazilian, Lebanese, Egyptian, Serbian, Japanese, Malaysian, Burmese, Polish, Thai and many more festivals are celebrated in Sydney. Thus, there are many more reasons for choosing Sydney and I hope my decision will work in my favor in the upcoming future.

## WHY AUSTRALASIAN INTERNATIONAL ACADEMY (AIA), SYDNEY ?

I have chosen Australasian International Academy, Sydney, Australia located at Suite 1, Level 5, 545 Kent St Sydney, NSW 2000. I was attracted to Australian International Academy because of its unique feature, facilities (services) and its location. AIA is a professional college located in Australia, which mostly focuses on the courses like Accounting, Business, Management, Child Care and IT. It provides student and professionals with increased skills and enables them to enter and compete in the Australian marketplace. It's creating new and modern facilities for all of its students and continually investing in latest technology, spaces, and support services. It also offers a very good platform for students regarding research with a lot of training opportunities. Basically, they provide a series of exceptional and completely planned courses to ensure individuals graduate with a tough competence. The instructors in AIA are highly qualified and experienced who help every student to achieve good education over there. I was attracted by excellent counseling services provided to students for ensuring whether the students are happy on track with their career paths or not. This institute also helps in home stay as it is able to advise us to home stay providers so we can select the right home when we move to Australia. AIA is located in the heart of Sydney with the easy access of transportation. Besides these, I followed the Australian Government's Department of Education and Training website ([www.cricos.education.gov.au](http://www.cricos.education.gov.au)) and searched for the other education providers like

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

Australian Vocational Learning, Westminster College and SABB College that offered same course of 104 weeks. But the cost of those providers was AUD 24,000, AUD 16,400 and AUD 14,700 per year respectively. The course fee of AIA is AUD 10,000 for Diploma in International Technology which lasts for 52 weeks and AUD 10,000 for Advanced Diploma of Information Technology that lasts for 52 weeks. Furthermore AIA focuses on business and technology related courses. I do not have any confusion that this college would provide me everything that I have expected.

Some benefits of studying in this institute are:

1. AIA college is registered on the Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS) to deliver courses for international students.
2. AIA will customize a training program with qualified professionals to come to your business and conduct in-house training sessions.
3. Employer of AIA will help students to coach student with their interview skills including role play.

## WHY INFORMATION TECHNOLOGY (IT) ?

Information technology as we all know is one of the fastest growing industry in today's world. Information technology is used in every field whether it is education, business, scientific research, innovation, market research, storing significant data, managing activities and so on. In common words everything that is done using computers and technology refers to information technology.

IT is used in every organization whether it is profit oriented or non-profit oriented. IT professionals are responsible for designing the infrastructures and the applications that organizations need to run the day to day work smoothly as well as effectively. The IT professionals at first understand the need and the type of any firm making applications, software, proper computing system, etc. according to their need. There are many reasons for

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

choosing IT as a career and some of them are listed below.

- In today's world, computers and information technology play a very vital role in doing our day to day activities like the way we keep in touch with others, business, getting important information and keeping ourselves up-to-date.
- Computers offer rewarding and challenging possibilities for a wide range of people regardless of their range of interests. It requires and develops capabilities in solving deep, multidimensional problems requiring imagination and sensitivity to a variety of concerns.
- Use of Information Technology gives rise to many new inventions as it works to solve the problems that mankind faces in day to day life. Scientific innovations are nowadays the product of computers and technology.
- The research on many fatal diseases such as AIDS, Cancer, TB, HIV and the research on bacteria and viruses have been easy due to the use of information technology and computers.
- Information technology is also regarded as backbone of many international companies and social networking sites like Microsoft, Samsung, Apple, Facebook, Twitter, Youtube, Google and so on.
- Computers and IT jobs are among the highest paid in the world and its one of the sector that plays a very important role in development of any country which also contributes globally.
- Information technology is an essential part of well-rounded academic preparation. An increasing number of universities and employers see successful completion of a computer science course as a sign of academic well-roundedness.
- Information technology in the future will be always growing and we cannot even imagine the possibilities it has in the future.

## WHY DIPLOMA AND ADVANCED DIPLOMA OF IT ?

I was always interested in computers and technology from my childhood. So, I joined took computer science as my major in high school. I have interest on computer, programming,

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

gaming and its related fields since my school days. However, I have to learn a lot about programming, web designing and more. In curriculum of NEB, we have to study computer science only in class 11 and 12 which included only the basic knowledge. So, instead of joining Bachelor directly I am willing to join diploma leading to advanced diploma which will my foundation that I need more strong and rigid. It will help me to increase my knowledge in computer science with more practical knowledge which will be much more beneficial for my further study.

The reasons for diploma leading to advanced diploma in IT are:

- Diploma will provide me with the basic knowledge of my course and will make me capable for further study in this field.
- As advanced diplomas are vocational courses they are more practical and flexible.
- This will give me the opportunity to understand the skills I need while allowing me to put these skills into practice enabling me to jump straight into the workforce with all the necessary knowledge and capabilities.
- Most of the companies seek for personnel who have great practical knowledge rather than just theoretical knowledge which will be a great merit for me.

Likewise, the diploma and advanced diploma will make prepared and ready for studying further courses like Bachelor Degree. Also, I will get one year credit after completing my diploma courses and study my bachelor for only two years rather than three years. The scope of Information technology is unlimited as it is applicable in every field. Studying IT will provide me with following opportunities in the future.

\*Business Analysts \*ICT Project Manager \*Networking Specialist \*Software Developer \*Web Designer \*System Analyst

Among all these technical professional I am particular interested in Software Developer. I was on to software for very early age. I have many ideas how software must be but I lack ability to make one. And I believe after the completion of this course, I will be able to gain enough information to execute it. I also believe that I will have a quality like creativity, collaboration

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

and other quality to be a software developer.

## FINANCE AND FUTURE PLANS

Regarding my finance, all my expense will be sponsored by my parents. They believe that it is their responsibility to look after my education. They are well aware of my expenses for entire course and they are financially secure to sponsor me. My motivation to come back to Nepal is my parents. Since they have dedicated their life for me now it is my responsibility to look after them as I come back. I am greatly motivated and ambitious in pursuing my degree in Australia to improve my efficiency. My stay in Australia is temporary. I have planned to study in Australia only to develop my career through better educational matters along with gaining international experience. After the completion of Advance Diploma of Information Technology, I will take credits point and join bachelor in Information Technology in one of the reputed universities of Australia. Continuously, after graduating I will go for Post Study Work (PSW) for 2 years to gain international work experience and practice skills in leading IT companies like Accenture, Microsoft, Infosys and lot more where I can get relevant experience and practical skills as Network Analyst, DBA, Software Engineer and many more.

I will feel one of the great people to fulfill my passion of completing my further education in the field of Information Technology. Information Technology is such a thriving industry where there is good demand core of IT personnel in the context of Nepal. This industry is really huge and holds a wide range of job opportunities for building a good career. So, upon completion of my course with some international work experience I will return back to my home country to utilize my qualification, knowledge, education and my experience. As my home country is still developing and is on the list of least developed countries so, there are tremendous opportunities and there is need of qualified IT personal. There are plenty of career outcomes for a graduate like me. Different sectors in Nepal like banking, hospitals and universities still lacks good software and they require is good engineer who would deliver them the best software as per their demand. The potential for software engineer is huge and I can also

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

expect a handsome salary of NRS 50,000 to 60,000 per month as a starting engineer which will gradually increase within few years' experience. I am quite sure that Australian graduate will certainly take me in the next dimension where I can earn a career reputation. Also with the Australian degree and experience I am expecting that I will be given prioritized in the IT companies of Nepal like NEPAL telecom, Ncell, Deer walk and many more.

Moreover, being the only daughter of the family, I will come back to bear the proper responsibilities of my family. Similarly, I cannot live without my sweet family for a long period. Additionally, with my dream, aim and passion, for me the happiness of my parents is very important, as they had done a great contribution for me right from the birth. They have always supported and encouraged me and make sure that there are no stones left unturned for my career. This is an unre-markable contribution for me. I can't pay for it but I can care and love in their old ages being on their side. Today I place where I am is due to my parents. After all with this motto on me, with completion of my degree and some experience, I will return back to my country.

## Conclusion:

I believe that I have met all my requirements for pursuing my course study in Australia. I hereby proclaim that all the information I provided are genuine to my knowledge. The only purpose I have is to achieve a quality education and get an International degree from recognized college/universities in Australia for certain period of time and return back to own country. I will abide by the prevailing rules and regulation of international students during my stay there.

So, I humbly request Australian High Commission to approve my application for a student visa and give me chance to acquire a quality education in Australia so I could give a contribution in certain sector to my country.

# GLOBAL EDUCATION & MIGRATION SERVICES

PH: +977 01 4423119

Also I am well aware of the Visa (subclass 500) condition that I have to follow during my stay in Australia like;

- 1: Maintaining 80% of attendance
- 2: Work permit of 40 hrs per fortnight
- 3: Clearance of 50% of subjects in each term
- 4: Attending the enrolled University for at least 6 months
- 5: Maintaining the Health Insurance during my entire stay
- 6: Informing the University/DIBP within 7 days if I change the address or contact details

I assure the Australian Government that I will stay within the condition of Visa (subclass 500) during my stay in Australia and perform no such activity that is against the Visa (subclass 500) condition.

Sincerely

.....
